About me

Highly motivated and detail-oriented full-stack developer with a strong educational background in computer science. Project management, leadership, and communication expert. Proficient in modern technologies. Seeking a role where I can apply my skills to high-quality projects and deliver robust products. Passionate about learning, problem solving, and building a future we can be proud of. Driven to succeed and help my peers accomplish goals.

Skills

Expert Communicator - Proven Project Manager - Expert Time Management - Expert Leadership - Fast Learner - Driven to take Ownership - Highly Adaptable - Dedicated Team Member - Expert Problem Solver

Experience

Web Developer, Freelance

OCT- 2024 - PRESENT, REMOTE

Technologies : SQL, Typescript, HTML, GO, NodeJS, React, Bootstrap, TailwindCSS

- Developed corporate website to showcase services and provide business information.
- Utilized Modern web frameworks and technologies including, GO, React, TypeScript, TursoDB, and AWS.
- Designed and implemented a modern, user-friendly website with clear navigation.
- Designed admin subdomain with authentication for future CRM integration.
- Implemented database integration and server-less functions for user inquiry requests.
- Developed communication pipelines to facilitate iterative design with customer feedback.

Outlier AI / Trainer in general/code

DEC- 2024 - PRESENT, REMOTE

Technologies: Typescript, Javascript, Python, GO, C++

- Performed Reinforcement Learning / Human Feedback (RLHF) Assessment tasks to evaluate model performance and provide feedback on model outputs.
- Conducted quality assurance processes to verify model competency and adherence to established standards and guidelines.
- Completed Code Assessment tasks to ensure code quality.
- Generated tests for evaluation to assess model performance and identify areas for improvement.
- Ensured test coverage for model outputs to guarantee all components are thoroughly tested and functional.

Resolvd LLC / Owner/Op.

JAN 2020 - JUN 2024, Gainesville, FL

Technologies: Adobe Suite, Auto-CAD, Envisioneer-BOM

- Demonstrated expertise in customer satisfaction, project management, plan adherence, scope retention, and cost management.
- Managed a diverse portfolio of projects from small investor condo remodels to multi-million dollar custom homes, serving over 200 satisfied customers.
- Successfully collaborated with large developers and suppliers on semi-custom and custom homes, consistently meeting or coming in under budget.
- Created communication pipelines between parties to facilitate quick response to issues and resolution.

Pepine Realty / Independent Agent

JAN 2021 - JUN 2024, Gainesville, FL

Technologies: CRM, MLS, Adobe Suite, CMS

- Facilitated communication, transactions, and marketing efforts while demonstrating strong time management.
- Enhanced communication abilities as an Independent Agent at a rapidly expanding Real Estate firm in Gainesville, Florida.
- Collaborated with Buyers/Sellers during high-pressure situations, fostering cooperation, understanding, and empathy.
- Exhibited excellent customer relationship development and retention with +90% return client rate.

Education

Full Sail University / C.S.b.s - GPA 3.75

NOV 2024 - Graduation - APR - 2027, REMOTE

- **Data Structures and Algorithms:**

- Designed, implemented, and optimized complex data structures (e.g., stacks, queues, trees) using C++.

- **Object-Oriented Programming:**

- Implemented object-oriented principles in C++.
- Utilized classes, objects, inheritance, polymorphism, and encapsulation to solve complex problems.
- Created robust class hierarchies with multiple inheritance and interface implementation.

- **Memory Management and System Architecture:**

- Implement memory-efficient algorithms using C++ (e.g., manual memory management, smart pointers).
- Design process scheduling algorithms (e.g., First-Come-First-Served, Priority Scheduling) to optimize system resource utilization.
- Utilize dynamic memory allocation and deallocation techniques (e.g., malloc, free).

- **Database Systems:**

- Design and implement databases using ORM.
- Develop foundational skills of functions, stored procedures, triggers, backups, tuning, and programming interfaces as well as security and authorization.
-

- **Artificial Intelligence and Machine Learning:**

- Apply machine learning techniques to real-world problems using C++.
- Develop predictive models for classification, regression, clustering, and dimensionality reduction tasks.
- **Code Quality and Debugging skills:**
 - Developed skills to identify and fix bugs utilizing debugging tools and methodologies.
 - Developed a systematic approach to optimizing code.
 - Created programs that effectively utilize memory.

Frontend Masters

AUG- 2023 - PRESENT, REMOTE

Front/Back Web Development

- Gained hands-on experience with front-end development using JavaScript and TypeScript
- Proficient in:
 - DOM manipulation and Virtual DOM rendering.
 - Expertise in HTML5, CSS3 (including Bootstrap and TailWind CSS)
 - Utilizing React, Svelte, and HTMX frameworks for building scalable web applications.
 - Understanding of component-based architecture, state management, and routing concepts.
- Developed skills in:
 - Handling complex UI components and layouts.
 - Implementing responsive design principles using media queries and flexbox and grid.
 - Optimizing application performance through caching, code splitting, and lazy loading.
 - Ensuring accessibility and cross-browser compatibility.
 - Aria implementations for enhancing site accessibility.
 - Utilizing development tools (e.g., Lighthouse, Axe, Wave)

Boot.Dev

AUG- 2023- PRESENT, REMOTE

- Gained comprehensive knowledge of back-end development concepts and best practices
- Proficient in:
 - Database design and schema development using SQL.
 - API design and implementation for scalable and secure data exchange.
 - Server-side programming with GO and Python.
 - Expertise in database management systems, including Postgres and relational databases.
- Familiarity with containerization and orchestration tools:
 - Docker for building, shipping, and running applications in containers.
 - Kubernetes for deploying, managing, and scaling containerized applications.
 - CI/CD Pipelines for continuous deployment.
- Strong understanding of full-stack development principles, including:
 - Integrating front-end and back-end components for seamless user experience.
 - Implementing authentication and authorization mechanisms using tokens and sessions.
 - Ensuring data consistency and integrity through database transactions and locking

mechanisms.

More about Me

In my next job it's important that...

I am deeply committed to education and professional development, and I want to work for a company that also values and supports employee growth and learning opportunities.

I want to work for a company that...

I thrive in environments where open communication and collaboration are priority, and I want to work with colleagues who share my passion for teamwork and mutual drive.

At work I'm best at...

At work, I am best at leveraging my analytical mindset and problem-solving skills to drive results. Whether it's tackling difficult technical issues or collaborating to bring new ideas to fruition.

I'm making a career change because...

I am following my dream. I have wanted to work in tech and learning programming since high school, however life took another path. I am seizing the opportunity to make my dream into a reality.

Right now I'm...

Retargeting my career path to software engineering and development. Currently obtaining my CS degree to deepen my knowledge of programming and technology. My desire is to position myself as a reliable resource for coworkers and peers to turn to for advice and aid.

Interests

I enjoy gardening and working on my home, currently renovating our house little by little. I enjoy Disc Golf when I get the opportunity. Spending time with my daughter. Learning every day.
